PROFESSIONAL SUMMARY

Computer Science student at BINUS University Bandung seeking an IT internship to apply and develop practical skills in programming, web development, databases, and technical problem-solving. Has worked on academic and personal software projects and participated in event logistics, vendor communication, and team coordination. Eager to learn, collaborate, and contribute to real-world IT projects.

EDUCATION

BINUS University — Bandung, Indonesia
Bachelor's Degree in Computer Science | 2024–Present | Expected graduation: 2028

SELECTED PROJECTS

SiNiKukiss — Cookies E-Commerce Website | HTML, CSS, JavaScript
- Built a frontend website project for a cookies store, focusing on product presentation and the online browsing experience.

Toko Craft — Handmade Product Store | HTML, CSS, JavaScript
- Created a storefront project for handmade products, emphasizing clear product presentation and an organized browsing experience.

Estimate — Budget & Material Planning App | Next.js, React, TypeScript, Supabase
- Worked on a web application project focused on organizing project requirements, materials, and budget planning. Specific implemented features and deployment status have not been confirmed.

EXPERIENCE & ACTIVITIES

BNCC — EEO Committee, Equipment & Logistics Division | 2024–2025*
- Supported equipment coordination, vendor identification, and price negotiation with committee members.
- Collaborated with a teammate to arrange a replacement when event presentation equipment was found damaged.

TECHNICAL SKILLS

Programming & Web: PHP, HTML, CSS, JavaScript, Python
Frameworks & Tools: Laravel, Docker, Git
Database: PostgreSQL

LANGUAGES

Indonesian; English (proficiency level not specified)

**BNCC dates are based on previously provided information and should be confirmed before submission. Project descriptions are kept conservative where implementation details have not been verified.*
